

GAURAV NIKAM

DATA ANALYST | SQL | PYTHON | POWER BI | TABLEAU

Email: gauravnikam072@gmail.com | Phone: +91 8669212675 | Location: Pune, Maharashtra, India

GitHub: <https://github.com/gauravnikam777-vision> | LinkedIn: <https://www.linkedin.com/in/gaurav-nikam-44842a345>

PROFESSIONAL SUMMARY

Aspiring Data Analyst and MCA student with hands-on experience in SQL, Python, Power BI, Tableau, and Excel. Skilled in data cleaning, exploratory data analysis (EDA), statistical analysis, dashboard development, forecasting, and predictive analytics. Built end-to-end analytics and machine learning projects focused on generating actionable business insights and supporting data-driven decision-making.

TECHNICAL SKILLS

Programming & Database: Python, SQL, MySQL

Data Analysis: Data Cleaning, EDA, Statistical Analysis, Data Visualization, Feature Engineering, Business Insights

Business Intelligence: Power BI, Tableau, Advanced Excel

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, XGBoost

Tools: Git, GitHub, Jupyter Notebook, Google Colab, Streamlit

PROJECTS

SuperStore Sales Dashboard & Forecasting | Power BI, Python

- Built an interactive Power BI dashboard analyzing sales, profit, and quantity KPIs across 4 business regions using DAX measures and drill-down visualizations.
- Performed EDA using Python to identify profitability issues, uncovering negative margins in the Tables category and strong Q4 seasonality trends.
- Developed a 20-day sales forecast with a 95% confidence interval to support inventory planning and revenue forecasting.

Customer Churn Prediction Dashboard | Python, SQL, Machine Learning

- Developed an end-to-end churn prediction system on a dataset of 7,043 customers and 20 business features using Logistic Regression.
- Identified 1,769 high-risk customers (25.1% of the customer base) and discovered key churn drivers including contract type, tenure, and monthly charges.
- Built an interactive dashboard for customer risk segmentation, churn probability analysis, and retention-focused business decision-making.

Trader Behavior Insights Analysis | Python, Data Analytics

- Analyzed trader behavior data to identify performance trends under different market conditions.
- Applied statistical analysis and visualization techniques to uncover profitability patterns.
- Generated analytical reports to support trading strategy evaluation.

Diabetes Risk Predictor (Live Web Application) | Python, XGBoost, Streamlit

- Developed and deployed a machine learning web application using XGBoost on a dataset containing 100,000 patient records and 8 predictive features.
- Engineered a complete ML pipeline including preprocessing, feature scaling, class imbalance handling, and probability-based risk prediction.
- Built an interactive Streamlit application that generates real-time diabetes risk assessments using patient health metrics.

CERTIFICATIONS

- Artificial Intelligence: Concepts and Techniques — NPTEL (2025)
- Python for Data Science — IBM (2025)
- Machine Learning Statistical Foundations — Wolfram Research (2025)
- Advanced Excel — ExcelR (2022)

EDUCATION

Master of Computer Applications (MCA) - Sinhgad Institute of Management, Pune | 2024 – 2026

Bachelor of Business Administration – Computer Applications (BBA-CA) - Savitribai Phule Pune University | 2021 – 2024
